Emgality® can help reduce the number of weekly cluster headache attacks that occur during a cycle.

Emgality is the first and only medication approved for the treatment of episodic cluster headache that reduces the number of attacks.

This guide provides information on:

- How Emgality can help
- Savings and support
- How to use Emgality

**Indication**
Emgality is a prescription medicine indicated in adults for the treatment of episodic cluster headache.

**Select Safety Information**
Do not use Emgality if you are allergic to galcanezumab-gnlm or any of the ingredients in Emgality.

Please see Purpose and Safety Summary on page 7. See Instructions for Use included with the device.

*Savings Card Inside*
How Emgality can help

Emgality can cut weekly cluster headache attacks in half or more during an episodic cluster headache cycle.

At the beginning of a study, people averaged 18 cluster headache attacks each week during an episodic cluster headache cycle.

Over the first 3 weeks, people taking Emgality had an average of 9 fewer attacks each week vs 5 fewer attacks each week for those taking placebo.

Weekly cluster headache attacks were cut in half or more for 71% of patients 3 weeks after taking their first dose of Emgality vs 53% for placebo.

Select Safety Information

Emgality may cause allergic reactions, such as itching, rash, hives, and trouble breathing. Allergic reactions can happen days after using Emgality. Call your healthcare provider or get emergency medical help right away if you have any of the following symptoms, which may be part of an allergic reaction:

• swelling of your face, mouth, tongue, or throat
• trouble breathing

Please see Purpose and Safety Summary on page 7. See Instructions for Use included with the device.

• This card must be accompanied by a valid prescription for Emgality and can only be used by one patient.
• Offer void where prohibited by law.
• This offer may be terminated, rescinded, revoked, or amended by Lilly USA, LLC at any time without notice. Card activation required. This Card is not health insurance. This Card expires on 12/31/2020.
• Terms and Conditions and eligibility requirements apply. Please see the full Terms and Conditions here.
• If you live in California, the Card expires on the earlier of: (i) the expiration date of this Card (12/31/2020) or (ii) the date an AB-rated generic equivalent for Emgality becomes available; or (iii) December 31, 2019, absent a change in Massachusetts state law. If you live in California, the Card expires on the earlier of: (i) the expiration date of this Card (12/31/2020) or (ii) the date an AB-rated generic equivalent for Emgality becomes available; or (iii) December 31, 2019, absent a change in Massachusetts state law. If you live in Massachusetts, the Card expires on the earlier of: (i) the expiration date of this Card (12/31/2020); (ii) the date an AB-rated generic equivalent for Emgality becomes available; or (iii) December 31, 2019, absent a change in Massachusetts state law.
• Offer void if healthcare provider is required to obtain prior authorization from a third party payor and the prior authorization is not secured prior to submission of the claim.
• Offer not applicable to over-the-counter product with the same active ingredients becomes available.
• All applicable taxes, fees, or amounts exceeding monthly or annual caps.
• Offer good for up to 12 months until 12/31/2020 if healthcare provider submits the prior authorization form or letter of authorization when you pick up your prescription.

If you live in Arkansas, the Card expires on the earlier of: (i) the expiration date of this Card (12/31/2020); (ii) the date an AB-rated generic equivalent for Emgality becomes available; or (iii) December 31, 2019, absent a change in Arkansas state law.

Emgality (galanezumab grml) 300mg injection
Getting started with Emgality
At the beginning of your cluster headache cycle, take 1 dose (3 syringes) of Emgality and then continue monthly until the end of your cluster cycle

• 1 dose (300 mg) comes in 3 prefilled syringes
• Administer the 3 injections (100 mg each) one after the other
• Continue to take monthly until the end of the cluster cycle

Consider having Emgality on hand to be prepared to take at the start of your next cluster cycle

Ensure you:
• Refrigerate product at 2°C to 8°C (36°F to 46°F) and in the original carton to protect it from light until use
• Check expiration date on product prior to use

Common side effects
Before starting any medication, it is important to consider some of the most common side effects. In a clinical trial, the most common side effects were injection site reactions.

Please see Purpose and Safety Summary on page 7. See Instructions for Use included with the device.

3 key steps to inject Emgality
Administer Emgality in the comfort of your own home

Prior to injecting, choose an area for injection:
• If self-injecting, choose the abdomen or thigh
• If another person is injecting, choose the buttocks or back of upper arm

Be sure not to inject in the exact same spot more than once. Always clean the injection site with an alcohol wipe and let it dry before injecting.

1 Uncap the syringe
2 Gently pinch and hold a fold of skin and insert the needle at a 45-degree angle
3 Inject slowly

IMPORTANT: These are abbreviated steps for using the prefilled syringe. When injecting Emgality, please refer to the Instructions for Use that come with your prefilled syringe. Before you inject for the first time, your doctor should show you how to prepare and inject Emgality.

PURPOSE AND SAFETY SUMMARY

Important Facts About Emgality® (em-GAL-ite-ē) injection. Also known as galcanezumab-gnlm.

Emgality is a prescription medicine used in adults for the treatment of episodic cluster headache. The medicine comes in 3 prefilled syringes, which are taken one after the other at the start of a cluster period and then every month until the end of the cluster period.

Warnings
Do not use Emgality if you are allergic to galcanezumab-gnlm or any of the ingredients in Emgality. Emgality may cause allergic reactions, such as itching, rash, hives, and trouble breathing. Allergic reactions can happen days after using Emgality. Call your healthcare provider or get emergency medical help right away if you have any of the following symptoms, which may be part of an allergic reaction: swelling of your face, mouth, tongue, or throat, or trouble breathing.

Common side effects
The most common side effects of Emgality are injection site reactions. These are not all the possible side effects of Emgality. Tell your doctor if you have any side effects. You can report side effects at 1-800-FDA-1088 or www.fda.gov/medwatch.

Before using
Before you use Emgality, discuss these questions with your doctor:
- Do you have other medical conditions?
- Do you take other medicines? Tell your doctor about all the prescription and over-the-counter drugs, vitamins, or herbal supplements you take.

Tell your doctor if:
- You are pregnant or breastfeeding.
- You are under age 18. It is not known if Emgality is safe and effective in children.

How to take
- Read the Instructions for Use that come with Emgality. There you will find information about how to store, prepare, and inject Emgality.
- Use Emgality exactly as your doctor says.
- If you miss a dose, inject it as soon as possible. Then, if your cluster period has not ended, inject Emgality one month after your last dose to get back on a monthly dosing schedule.

Learn more
For more information, go to www.emgality.com or call 1-833-EMGALITY (1-833-364-2548) Monday – Friday, 9 am – 8 pm EST.

This summary provides basic information about Emgality, but it does not include all information known about this medicine. Read the information that comes with your prescription every time you have a prescription filled. Talk to your doctor or pharmacist about this information. Your doctor is the best person to help you decide if Emgality is right for you.

GZ CON ECH BS 04JUN2019

Select Safety Information
Before you use Emgality, tell your healthcare provider if you are:
- pregnant or plan to become pregnant. It is not known if Emgality will harm your unborn baby
- breastfeeding or plan to breastfeed. It is not known if Emgality passes into breast milk
- taking any prescription or over-the-counter medicines, vitamins, or herbal supplements

Please see Purpose and Safety Summary on page 7. See Instructions for Use included with the device.

How Emgality works
Emgality was specifically developed to bind to CGRP, a substance in the brain that may play a key role in episodic cluster headache, and block its binding to the receptor

CGRP
Calcitonin gene-related peptide.

EMGALITY

CGRP RECEPTOR

Emgality injection site.

CGRP
Calcitonin gene-related peptide.
Discover what Emgality can do

Emgality can help **reduce the number of weekly attacks** that occur during an episodic cluster headache cycle.

**One monthly dose** (300 mg) comes in 3 prefilled syringes (100 mg each) that should be injected at the beginning of your cluster cycle, and then monthly until the end of your cluster cycle.

**Select Safety Information**

Do not use Emgality if you are allergic to galcanezumab-gnlm or any of the ingredients in Emgality.
